INDEX OF SUBJECTS

- Acetone, postoperative output in urine, 309
- Acidosis: metabolic, 274, 310; respiratory, [Grégoire] 142, 274
- A.C.T.H.: [Romagnoli] action of, 255, and anaesthesia, 258
- Aggression, in surgery, 34
- Alveolar carbon dioxide, determination of, [Rice] 69
- Alveolar respiratory tests, 64
- Anaesthesia: deaths from, in Alberta, [Gain] 81; history of, in Canada, [Shields] 301; new drugs in, evaluation of, [Melville, Gilbert *et al.*], 1, 5
- Anaesthetist, essential qualities of, [Gardner] 215
- Aneurysms, and hypothermia, 319
- Apnoea: with depolarizing relaxant, [Fairley] 380; after relief of respiratory

- obstruction, 249; with succinylcholine, [McGarry] 263, in mitral commissurotomy, [Little and Sutton] 163
- Arterial blood, and respiratory acidosis, 148
- Aspiration, of vomitus, [Whalen] 366. *See also* Secretions
- Benadryl.** *See* Diphenhydramine
- Biocemesis, induced, [Paradis *et al.*] 32

1. The first part of the report deals with the general situation of the country and the progress of the work during the year. It is divided into two main sections: the first section deals with the general situation of the country and the progress of the work during the year, and the second section deals with the results of the work during the year.

2. The second part of the report deals with the results of the work during the year. It is divided into two main sections: the first section deals with the results of the work during the year, and the second section deals with the results of the work during the year.

3. The third part of the report deals with the results of the work during the year. It is divided into two main sections: the first section deals with the results of the work during the year, and the second section deals with the results of the work during the year.

4. The fourth part of the report deals with the results of the work during the year. It is divided into two main sections: the first section deals with the results of the work during the year, and the second section deals with the results of the work during the year.

5. The fifth part of the report deals with the results of the work during the year. It is divided into two main sections: the first section deals with the results of the work during the year, and the second section deals with the results of the work during the year.

6. The sixth part of the report deals with the results of the work during the year. It is divided into two main sections: the first section deals with the results of the work during the year, and the second section deals with the results of the work during the year.

7. The seventh part of the report deals with the results of the work during the year. It is divided into two main sections: the first section deals with the results of the work during the year, and the second section deals with the results of the work during the year.

8. The eighth part of the report deals with the results of the work during the year. It is divided into two main sections: the first section deals with the results of the work during the year, and the second section deals with the results of the work during the year.

9. The ninth part of the report deals with the results of the work during the year. It is divided into two main sections: the first section deals with the results of the work during the year, and the second section deals with the results of the work during the year.

10. The tenth part of the report deals with the results of the work during the year. It is divided into two main sections: the first section deals with the results of the work during the year, and the second section deals with the results of the work during the year.
